REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious the overall claimed invention of an apparatus for mixing a fluid and medicament with a medicament delivery device, comprising: a medicament dosing member having a chamber therein including a chamber inlet in fluid communication with a valve outlet and chamber outlet, a medicament in the chamber and membranes sealing the chamber inlet and outlet; a penetration member adapted for breaching of the membranes; whereby transition of a pressure member from a first position to a second position generates fluid under pressure at a pressure member outlet and opening of a valve releases fluid under pressure into the chamber inlet, breaching the membranes by application of the penetration member and expressing the medicament in the chamber through the chamber outlet of the medicament dosing member.
